

QDialog

```
graph BT; savefile --> QDialog
```

A UML class diagram showing a directed association between two classes. The class 'savefile' is represented by a gray rectangle with a thick black border at the bottom. The class 'QDialog' is represented by a white rectangle with a thin gray border at the top. A dark blue arrow points from the top edge of the 'savefile' box to the bottom edge of the 'QDialog' box, indicating a directed association from 'savefile' to 'QDialog'.
